

## **CS1303 Midterm Exam (50 minutes)**

Time: 12:30 pm – 1:20 pm, February 26, 2021, Location: ----

### **About the mid-term exam**

#### **Coverage:**

**Only chapters 1, 2, and 3**

**Lecture notes: from 2021-01-11 to 2021-02-08**

**Tutorials: from 2021-01-14 to 2021-02-04 + the first question in 2021-02-11**

**Assignments 1, 2, and 3**

**In the mid-term exams, there are**

- **5 multiple-choice questions: similar questions have been discussed in class or tutorial.**
- **3 other questions: similar questions are in the assignments 1, 2, and 3.**

**Notes: You need to particularly check all tutorial questions mentioned in the above coverage. You also need to check the assignment questions!!!**

**Good luck! If you have any question when you go over the above main points of knowledge, you are welcome to discuss with me.**

#### **Midterm Requirements**

1. This semester's midterm exam is **open-book**, you can have any materials at hand, but cannot discuss with other students.
2. I will zip the midterm exam paper with a strong password, and upload on D2L (in the directory Midterm Exam Paper) in the early morning of February 26, 2021, so that all students can download it on their own computers, but cannot open it.
3. Around 12:25 pm, February 26, 2021, I will send an email to all CS1303 students about the password to unzip the exam paper.
4. Each student prepare some clean papers, and can write down his/her midterm exam on these clean papers between 12:30 pm – 1:20 pm.
5. From 1:20 pm - 1:30 pm, each student need to take photos on all his/her papers (do not miss any page), zip them and upload them to the midterm exam directory on D2L (Midterm, February 26, 2021).
6. I will check the uploading time. If the uploading time is after 1:30 pm, 50 marks penalty will be applied. If no submission, I will consider the midterm exam is 0 mark.
7. Of course, I will consider some special cases, only if some students discuss with me about their cases early. I will record their cases in a formal report and take some actions case by case for those students.
8. Each student needs to have a smartphone, or iPad in hand so that he/she can take photos on his/her paper for submission.
